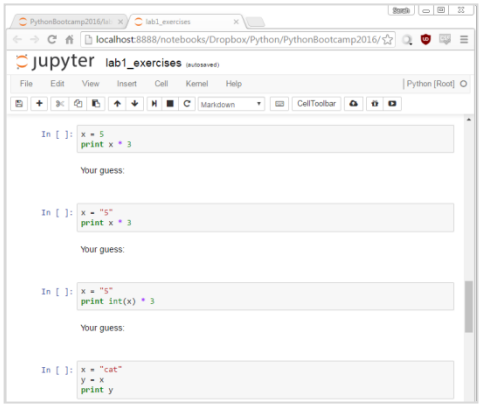
Opens



Jupyter Server

- Do not close this window until you are completely done!
- You can't use this terminal window while the server is running
- To end the server: Ctrl+C twice
- This server is not accessible from the internet (there are ways you could make it accessible, but it's not by default).

Jupyter File Browser

- Do not close this tab until you are completely done!
- The files shown are all on your computer.
- Although it uses your web browser, it does not use the internet.
- <u>Think of it as just a viewer/naviagtor for files on your computer.</u>
- Click a notebook (.ipynb file) to open it.

Jupyter Notebook

- You can have many notebooks open at once.
- Closing this tab does not actually terminate the notebook (it'll keep running in the background).
- To terminate the notebook, go to File > Close and Halt
- When you edit this notebook here, you are editing the notebook on your computer.
- When you save this notebook here, you are saving it on your computer.
- Make sure to save before closing.
